

NuWave and BrightStrand Announce Partnership

NuWave Technologies and BrightStrand International announce their partnership in EMEA!

NuWave Technologies, the leader in HPE NonStop Web services integration, is excited to announce their partnership with BrightStrand International, a UK-based company that has been delivering IT services to customers worldwide in all market sectors, including banking and finance, telecommunications, government, healthcare, public sector, retail, and manufacturing for over 20 years.

The partnership allows EMEA customers to benefit from support by BrightStrand for NuWave connectivity solutions such as LightWave Client™ and LightWave Server™, which allow NonStop customers to interoperate with other platforms and applications using REST-based services.

BrightStrand provides customers in the region with support that includes help with evaluations, installation, configuration, and first-level support during the pre-sales and post-sales process.

“We’ve enjoyed working with BrightStrand on accounts in EMEA over the last couple of years,” says NuWave CEO Gabrielle Guerrero, “and we look forward to collaborating with them even more now that our relationship is formalized. Their dedication to understanding our products inside and out from a technical standpoint, and their eagerness to learn the many business benefits of the solutions to NonStop users made onboarding them easy.”

Commenting on the partnership announcement, Joyce Sowersby, Managing Director of BrightStrand added “We are delighted that our previous successful working relationship with NuWave has led to the formalisation of this partnership between our companies. We believe that combining Nuwave’s product offerings with BrightStrand’s technical expertise will provide an excellent business solution for customers “

BrightStrand’s commitment to quality of service and staff matches the high standards that NuWave customers have experienced for many years. The companies plan to share a booth at user groups events once the coronavirus cloud has been lifted..
